Information

Gaiters GN 808.1 give universal joints full protection against ingress of dirt.

At the same time they can be filled with grease which gives long term lubrication for friction bearings.

The gaiters are secured at each end with two cable ties.

How to order

Gaiter
GN 808.1-25-E

Code No. | |
d₁ | |
Type | |

Two cable ties are part of each gaiter.
