

Ganter's product range includes many standard elements for the functional completion of profile systems. These include, for instance, Cabinet U-Handles, Hinges, Tube Clamp Connectors, Clamp Holders, Indexing Plungers and T-Nuts for the profile systems. GN 960 and GN 961 Angle Connector Brackets developed by Ganter, round out this specific product offering.

## Product family Standard Parts for Profile Systems

All standard parts of this product family are marked by their own icon which makes navigation easier and shows at a glance that this is a Ganter standard with profile system compatibility.

Driven by the consistent service idea, Ganter now also offers the matching assembly sets - in the tried and tested style of Ganter's own standard. Both the new assembly set standards evolving from this each consist of T-Nuts for the T-Slots of the profile and screws with various head shapes according to DIN / ISO specifications.

### Assembly sets GN 965

For profile sizes of 30 and 40 mm, with T-Slot widths of 6 and 8 mm, **GN 965** (→ page 8) provides the necessary screw head shapes and thread lengths for every clamping or, fastening application. The roll-in T-Nut GN 506 (page 27), also available separately, can be placed into the T-Slot of the profile either at the ends or at any point in between, by turning it on it's side and sliding it into place. The guide lip of the T-Nut combined with a spring element (ball / pressure spring) creates a simpler installation of the entire assembly unit which, secures the unit in the slot via the T-Nut.

### Assembly sets GN 968

For profile sizes of 30, 40 or, 45 mm, with slot widths of 8 or, 10 mm, **GN 968** (→ page 16) provides the necessary screw head shapes and thread lengths for every clamping and fastening application. The drop-in serrated T-Nut GN 505 (→ page 25), also available separately, can be placed into the T-Slot of the profile at any point by dropping it into the slot and twisting it a quarter turn which, creates a quick and simple installation of the entire assembly unit.
